## Staff Views

Teaching through REAL projects helps to really engage children with their learning as they have a clear outcome that they work towards through small steps. The aim is the project is shared with children and they are always eager to answer the essential question and share their learning with other year groups. NQT 2020/21.

## Governor Views

REAL Projects is transforming the curriculum at St Ann's and the way children learn. They gain knowledge through an in depth investigation for an extended period of time of projects that are of value to the community and the world beyond the classroom. Through rigorous investigation, questioning, research and discussion, they respond to a complex challenge or problem and have the opportunity to present their findings to a real audience. This approach fires children's imagination, involves them working together, teaches problem-solving, and results in extraordinary work they can be proud of.
